

**§ 130A-412.24. Facilitation of anatomical gift from decedent whose body is under the jurisdiction of a medical examiner.**

(a) Upon request of a procurement organization, a medical examiner shall release to the procurement organization the name, contact information, and available medical and social history of a decedent whose body is or will come under the jurisdiction of the medical examiner. If the decedent's body or body part is medically suitable for transplantation, therapy, research, or education, the medical examiner shall release postmortem examination results to the procurement organization. The procurement organization may make a subsequent disclosure of the postmortem examination results or other information received from the medical examiner only if relevant to transplantation or therapy.

(b) The medical examiner may conduct a medicolegal examination, including physical examination of a donor or prospective donor and review of all medical records, laboratory test results, X-rays, other diagnostic results, and other information that any person possesses about a donor or prospective donor whose body is under the jurisdiction of the medical examiner or whose body would be under the medical examiner's jurisdiction upon death and that the medical examiner determines may be relevant to the investigation.

(c) A person that has any information requested by a medical examiner pursuant to subsection (b) of this section shall provide that information as expeditiously as possible to allow the medical examiner to conduct the medicolegal investigation within a period compatible with the preservation of body parts for the purpose of transplantation, therapy, research, or education.

(d) If an anatomical gift has been or might be made of a body part of a decedent whose body is under the jurisdiction of the medical examiner and a postmortem examination is not required, or the medical examiner determines that a postmortem examination is required but that the recovery of the body part that is the subject of an anatomical gift will not interfere with the examination, the medical examiner and procurement organization shall cooperate in the timely removal of the body part from the decedent for the purpose of transplantation, therapy, research, or education.

(e) If an anatomical gift of a body part from the decedent under the jurisdiction of the medical examiner has been or might be made, but the medical examiner initially believes that the recovery of the body part could interfere with the postmortem investigation into the decedent's cause or manner of death, the collection of evidence, or the description, documentation, or interpretation of injuries on the body, the medical examiner shall consult with the procurement organization or physician or technician designated by the procurement organization about the proposed recovery. After consultation, the medical examiner may deny or allow the recovery.

(f) If the medical examiner or designee allows recovery of a body part under subsection (d) or (e) of this section, the procurement organization shall provide the medical examiner or designee with a record describing the condition of the body part signed by the physician or technician who removes the body part and any other information and observations that would assist in the postmortem examination. (2007-538, s. 1.)
