

**§ 131E-207.5. Patient visitation rights for residents of hospice care facilities.**

(a) Each hospice care facility licensed under this Article shall permit patients to receive visitors to the fullest extent permitted under any applicable rules, regulations, or guidelines adopted by either the Centers for Medicare and Medicaid Services or the Centers for Disease Control and Prevention or any federal law.

(b) In the event the Centers for Medicare and Medicaid Services, the Centers for Disease Control and Prevention, or any other federal agency finds a hospice care facility has violated any rule, regulation, guidance, or federal law relating to a patient's visitation rights, the Department may issue a warning to the hospice care facility about the violation and give the hospice care facility not more than 24 hours to allow visitation. If visitation is not allowed after the 24-hour warning period, the Department shall impose a civil penalty in an amount not less than five hundred dollars (\$500.00) for each instance on each day the hospice care facility was found to have a violation. This civil penalty shall be in addition to any fine or civil penalty that the Centers for Medicare and Medicaid Services or other federal agency may choose to impose.

(c) Notwithstanding the provisions of subsection (b) of this section, in the event that circumstances require the complete closure of a hospice care facility to visitors, the hospice care facility shall use its best efforts to develop alternate visitation protocols that would allow visitation to the greatest extent safely possible. If those alternate protocols are found by the Centers for Medicare and Medicaid Services, the Centers for Disease Control and Prevention, or any other federal agency to violate any rule, regulation, guidance, or federal law relating to a patient's visitation rights, the Department may impose a civil penalty in an amount not less than five hundred dollars (\$500.00) for each instance on each day the hospice care facility was found to have a violation. This civil penalty shall be in addition to any fine or civil penalty that the Centers for Medicare and Medicaid Services or other federal agency may choose to impose.

(d) Each hospice care facility shall provide notice of the patient visitation rights in this act to patients and, when possible, family members of patients. The required notice shall also include the contact information for the agency or individuals tasked with investigating violations of hospice care facility patient visitation.

(e) Subject to, and to the fullest extent permitted by, any rules, regulations, or guidelines adopted by either the Centers for Medicare and Medicaid Services or the Centers for Disease Control and Prevention or any federal law, each hospice care facility shall allow compassionate care visits. A hospice care facility may require compassionate care visitors to submit to health screenings necessary to prevent the spread of infectious diseases, and, notwithstanding anything to the contrary in this section, a hospice care facility may restrict a compassionate care visitor who does not pass a health screening requirement or who has tested positive for an infectious disease. A hospice care facility may require compassionate care visitors to adhere to infection control procedures, including wearing personal protective equipment. Compassionate care situations that require visits include, but are not limited to, the following:

- (1) End-of-life situations.
- (2) A patient who was living with his or her family before recently being admitted to the facility is struggling with the change in environment and lack of physical family support.
- (3) A patient who is grieving after a friend or family member recently passed away.
- (4) A patient who needs cueing and encouragement with eating or drinking, previously provided by family or caregivers, is experiencing weight loss or dehydration.
- (5) A patient, who used to talk and interact with others, is experiencing emotional distress, seldom speaking, or crying more frequently when the patient had rarely cried in the past. (2021-171, s. 4; 2021-181, s. 2(c).)
