NET STATE IMPACT	Likely budget cost. See Assumptions & Methodology section for additional details.				

PRINCIPAL DEPARTMENT(S) & PROGRAM(S) AFFECTED:

Administrative Office of the Courts; Indigent Defense Services; Department of Public Safety

EFFECTIVE DATE: December 1, 2017

TECHNICAL CONSIDERATIONS:

None

FISCAL IMPACT SUMMARY:

The proposed bill may have a fiscal impact to address the expanded scope of an existing offense. However, given that there is no historical data on the elements of the expanded scope to use as a proxy for predicting the total number of new offenses, the Fiscal Research Division cannot reasonably estimate the total additional costs that may be incurred. The following costs may be incurred for every one person charged and convicted of this crime:

- Administrative Office of the Courts: \$10,885 per disposition
- Indigent Defense Services: \$1,410 per disposition
- Department of Public Safety (DPS) - Prisons: \$79,061 per conviction
- DPS - Community Corrections: Minimum of \$1,776 per conviction

Please see the Assumptions and Methodology section for additional information.

BILL SUMMARY:

The bill expands the conduct punishable under an existing Class B1 felony. Under G.S. 14-27.21, it is currently a Class B1 felony for a person to employ or display a dangerous or deadly weapon or an article which the other person reasonably believes to be a dangerous or deadly weapon when committing forcible

rape. This bill would expand the prohibited conduct to include threatening to use a dangerous or deadly weapon when committing forcible rape.

ASSUMPTIONS AND METHODOLOGY:

General

The Sentencing and Policy Advisory Commission prepares prison population projections for each bill containing a criminal penalty. The Commission assumes for such bills that expanding existing or creating new criminal offenses produces no deterrent or incapacitative effect on crime. Therefore, the Fiscal Research Division does not assume deterrent effects for any criminal penalty bill.

S.L. 2011-192 (H.B. 642), the Justice Reinvestment Act (JRA), made changes to North Carolina's court system, corrections system (both to prisons and probation), and to post-release supervision. All active sentences for felony offenses now result in a minimum of twelve months of post-release supervision (PRS) for B1-E level offenses and a minimum of nine months of PRS for F-I level offenses.

JRA also created the Statewide Misdemeanant Confinement Program (SMCP) for housing misdemeanants with sentences between 90 and 180 days in county jails (misdemeanants with shorter sentences were already the responsibility of the counties). County participation in the program is voluntary. The SMCP pays participating counties for misdemeanants' housing, transportation, and medical costs. In 2014, the program was expanded to include all misdemeanants with sentences longer than 90 days. The Sentencing and Policy Advisory Commission does not track county jail capacity, so it is not possible to estimate the impact of new or increased misdemeanor penalties on county jails.

Judicial Branch

The Administrative Office of the Courts provides Fiscal Research with a fiscal impact analysis for most criminal penalty bills. For such bills, fiscal impact is typically based on the assumption that court time will increase due to anticipated increases in trials and corresponding increases in workload for judges, clerks, and prosecutors. This increased court time is also expected to result in greater expenditures for jury fees and indigent defense.

The bill expands the scope of an existing Class B2 felony offense. It is not known how many new charges may occur as a result of this expanded scope. AOC provides estimates of the average cost to the court for a charge by offense class. For every additional person charged with a Class B2 felony, the average cost to the court would be \$10,885.

The Office of Indigent Defense Services (IDS) has provided Fiscal Research with the frequency and cost of indigent defense services for each level of crime, including the cost differentials for district and superior court with and without a trial and the percentage of cases handled in each category. Fiscal Research used this data to calculate a weighted average of IDS costs. In FY 2011-12, the most recent year data is available, 85% of Class B2 felony cases were handled through IDS. The weighted average cost of a Class B2 felony is \$1,410 per case for a private appointed counsel (PAC) attorney. This estimate assumes the appointment of a PAC attorney. In districts that have Public Defender offices, cases may be handled by those offices. In those instances, this cost may not be incurred.

Department of Public Safety – Prisons

The chart below depicts the projected inmate population relative to available prison bed capacity system-wide. Capacity projections assume operation at Expanded Operating Capacity,¹ and represent the total number of beds in operation, or authorized for construction or operation as of December 2016.

Based on the most recent population projections and estimated bed capacity, there are surplus prison beds available for the five-year fiscal note horizon and beyond. Therefore, no additional beds will be required unless the projected number of additional inmates resulting from a bill (row four) exceeds the projected number of beds under the inmate population (row three).

Population Projections and Bed Capacity Five Year Impact					
	June 30 2018	June 30 2019	June 30 2020	June 30 2021	June 30 2022
1. Inmates ²	37,304	37,601	37,367	37,385	37,642
2. Prison Beds (Expanded Capacity)	38,373	38,373	38,373	38,373	38,373
3. Beds Over/(Under) Inmate Population	1,069	772	1,006	988	731
4. Additional Inmates Due to this Bill³	No estimate available				
5. Additional Beds Required					

Since the bill expands the scope of an existing offense, the Sentencing Commission does not have any historical data from which to estimate the impact of this bill on the prison population. A threshold analysis is provided when it is not known how many offenders might be convicted and sentenced as a result of the proposed change. For each offense class, the threshold estimate is the number of convictions that result in the need for one prison bed in the first year.

In FY 2015-16, 100% of Class B2 felony convictions resulted in active sentences, with an average estimated time served of 173 months. Nine months of post-release supervision is required upon release from prison following an active sentence or revocation of probation. The following table shows the estimated annual impact if there was one conviction (the threshold) or 20 convictions for this proposed offense per year. The five year estimate takes into account the combination of active sentences and probation and post-release supervision violations resulting in confinement, as well as growth rates adopted by the Sentencing Commission’s Forecasting Technical Advisory Group.

¹ Expanded Operating Capacity (EOC) is: 1) the number of single cells housing one inmate, 2) the number of single cells housing two inmates, and 3) the number of beds in dormitories, allowing between 35 (130% of Standard Operating Capacity) and 50 (SOC) square feet per inmate.

² The Sentencing and Policy Advisory Commission prepares inmate population projections annually. These projections are derived from: historical information on incarceration and release rates under Structured Sentencing; crime rate forecasts by a technical advisory group; probation and offender revocation rates; and the decline (parole and max-outs) of the stock prison population sentenced under prior sentencing acts. Projections were updated in February 2017.

³ Criminal penalty bills effective December 1, 2017 should not affect prison population and bed needs until FY 2018-19 due to the lag time between offense charge and sentencing - six months on average. No delayed effect is presumed for the Court System.

Estimated Prison Bed Impact Using Threshold Convictions and 20 Convictions Class B2 Felony					
Convictions	Year 1	Year 2	Year 3	Year 4	Year 5
1 (Threshold)	1	2	3	4	5
20	20	41	61	82	102

In addition to the capital costs that may be associated with additional bed needs, there are also per diem costs for housing inmates. The cost to add one additional inmate to the prison system is \$15.02 per day, or \$457 per month, which includes the cost of food, clothing, and health care. In FY 2015-16, all Class B2 felony offenders received active sentences averaging 173 months. For every one Class B2 felony offender receiving an active sentence, the cost to the prison section will be \$79,061 (\$457 monthly cost times 173 months).

Department of Public Safety – Community Corrections

All active sentences for felony offenses now result in a minimum of twelve months of post-release supervision (PRS) for B1-E level offenses and a minimum of nine months of PRS for F-I level offenses. Additionally, for felony offense classes F through I offenders may be given non-active (intermediate or community) sentences exclusively, or in conjunction with imprisonment (split-sentence). Sanctions include electronic house arrest, community service, substance abuse treatment, participation in educational or vocational skills development, payment of court costs, fines, and restitution, and short-term jail sentences not exceeding six days per month.

JRA essentially eliminated the distinction between “community” and “intermediate” supervision. Under structured sentencing, the two types of supervision were each defined by a set of specific sanctions. Under JRA, both community and intermediate probation may now include electronic monitoring, short-term periods of confinement, substance abuse assessment, monitoring, and treatment, participation in educational programs or vocational skills development. Whether a probationer is subject to more stringent conditions is determined by the results of a risk-needs assessment administered by the Department of Public Safety.

All types of post-release supervision are supervised by the Community Corrections Section (CCS); CCS also oversees community service. Supervision by a probation officer costs \$148 per offender, per month; no cost is assumed for those receiving unsupervised probation, or who are only ordered to pay fines, fees, or restitution. Total costs are based on average supervision length and the percentage of offenders (per offense class) sentenced to active sentences requiring post-release supervision and supervised probations.

In FY 2015-16, all Class B2 felony offenders received active sentences. All active sentences for Class B1 through D felonies result in 12 months of post-release supervision (PRS). Therefore one conviction resulting from this bill will require at least 12 months of supervision. The cost of 12 months of supervision is \$1,776 per offender (\$148 per month times 12 months).⁴

SOURCES OF DATA: Department of Public Safety; Administrative Office of the Courts; North Carolina Sentencing and Policy Advisory Commission; Office of Indigent Defense Services.

TECHNICAL CONSIDERATIONS: None

⁴ Due to the effective date of December 1, 2017 and the typical lag time between charge and conviction (6 months), little impact is assumed for CCS in FY 2017-18. Though some offenders may come under CCS supervision during this time, this note assumes an even entry over the course of FY 2018-19.
